

PiMag® Waterfall Gravity Water System

Simple operation, advanced water-contaminant reducing technology

- Natural, gravity-fed filtration – no need for electricity
- Minerals that help to adjust pH to create alkaline water
- Certified filtration to reduce contaminants
- Filter life LED indicator
- Fits perfectly onto your kitchen worktop
- Gold Seal of Approval from the Water Quality Association
- Non-leaching and BPA free materials.

Multiple-stage processing

Depending on the water supply and pipes, tap water can contain traces of many chemicals, including chlorine, disinfectant by-products, sediments, heavy metals, and pesticides. Nikken PiMag® water products have been developed to transform your normal tap water into clean PiMag® water.

The first stage of the PiMag® Waterfall Gravity System is a pre-filter, removing larger particles from the water. The second stage is where the water passes through activated carbon to capture microscopic particles. Activated carbon is a natural material that is made by processing charcoal in an oxygen-rich environment to create a vast surface area, typically between 500-2500 square metres per gram. The final stages include a mineralisation process as the water flows through a layer of pi minerals; these minerals increase the pH of the water, making it alkaline, and decrease the ORP (Oxidation Reduction Potential). The water then flows over a bed of mineral stones, ending in a powerful magnetic energising and conditioning process.

Highest design standards

The PiMag® Waterfall Gravity Water System has a modern, compact profile to fit conveniently into modern kitchen environments. All Nikken PiMag® water products are designed to the highest standards, non-leaching, and free of BPA and other oestrogenic chemicals. With its Gold Seal of Approval from the Water Quality Association, the PiMag® Waterfall meets rigorous standards for performance, capacity, and integrity, removing a variety of drinking water contaminants.

How to use

Fill top tank with water. Filtered PiMag® water collects in the lower supply tank. The filter-life LED indicator turns from green to red when it is time to renew the filter.

Filter replacement

Filter cartridge: 90 days or 900 litres, whichever comes first (the sensor informs you when usage has reached 900 litres).

Mineral stones: 1 year. Component life may vary depending on the water quality.

Care instructions

Do not attempt to carry or move the PiMag® Waterfall when fully assembled and keep away from direct sunlight. Clean only by rinsing in cold water; do not use any abrasive cleaners, paper towels, or hot or soapy water.

Endorsements and certifications

The PiMag® Waterfall Gravity Water System has received the coveted Gold Seal of Approval from the Water Quality Association in the United States of America, as well as certifications under NSF International standards 42 and 53.

Technology	Field Gradient Magnetic and PiMag Water Technologies – gravity flow, multiple-filtration.
Weight	3kg
Capacity of tank	Fill tank 5 litres/ supply tank 5.5 litres
Dimensions	W 22.5cm, H 42.3cm, D 32.5cm
Magnet Strength	1200 Gauss
Materials contained in the product	Pi material, mineral stones, recyclable polymer, magnet.
